Mary, Mark,

You are probably aware (but in case not), Phil Dellinger from R6 will be presenting (with Bill Bates in OGWDW supporting) on the UIC NTW seismicity report at the NGA State Learning Network for Responsible Shale Development webinar series this afternoon. Presentation is attached.

Thanks,
Holly

Ok. Went through this in about 9 minutes. Made a few more changes. This is what I will send to Aliza after your comments incorporated.

Too much of a hurry.

Subject: Multi Agency Collaboration

Good morning Phil,

I got your message. The main group is DOE, USGS, and EPA. There have been some recent additions NSF and National Institute of Health. However, they are a part of the larger group that are working on the other six topic areas. The Induced Seismicity topic area only includes DOE, USGS and EPA. I am sure other federal agencies can participate if there was any interest, but I have not heard any other federal agency being interested.

I hope that helps. Let me know if you need more info

Cheers
Bill
